**N.B.:** The National Bank of Belgium uses a new method to elaborate the external trade statistics based on the national concept since the publication of the statistics related to November 2009. Presently, this method is only applied on the compilation of the statistics after 10 weeks to assure a certain level of soundness. In order not to disrupt the necessary cohesion between different frequencies of publication of those statistics, the publication of the flash estimation after 6 weeks is temporarily suspended.

- (1) The year 2006 being a transitory year where the previous data collection system and the switch to the new data collection and production system have coexisted, the production of the related statistics could have been influenced by this situation.
- (2) Due to modifications in the sources between 2006 and 2007 a methodological rupture appears.
