Quarterly financial statement of the National Bank of Belgium as at 31 December 2021

1. Items not related to monetary policy operations

In the quarter ending 31 December 2021, the balance sheet position in foreign currency (asset items 2 and 3 minus liability items 6, 7 and 8) decreased by € 51 million to € 8,413 million.

The position in gold (asset item 1) increased by € 872 million to € 11,767 million.

The holdings by the Bank in euro (asset items 4, 6 and 7.2 minus liability items 3 and 5) decreased by € 5,049 million to - € 2,533 million.

Banknotes in circulation (liability item 1) increased by € 1,320 million to € 51,768 million.

Liabilities to general government (liability item 4.1) increased by € 915 million to € 5,440 million.

The liability within the Eurosystem (liability item 9.3) increased by € 33,933 million to € 85,662 million.

2. Items related to monetary policy operations

The Eurosystem's net lending to its counterparties in the Belgian financial sector through open market operations (asset items 5.1 to 5.4 minus liability items 2.3 to 2.5) decreased by € 477 million to € 87,638 million.

Only the deposit facility (liability item 2.2) was used at 31 December 2021.

The holdings by the Bank of securities held for monetary policy purposes (asset item 7.1) increased by € 10,429 million to € 212,654 million.

3. Current accounts of the euro area financial sector

The current account position of counterparties with the Bank (liability item 2.1) decreased by € 15,528 million to € 97,195 million.

4. Quarterly revaluation of balance sheet items

According to the harmonised accounting rules for the Eurosystem, gold, foreign exchange, security holdings (other than statutory investment, held-to-maturity portfolios and securities held for monetary purposes) and financial instruments are revalued at market rates and prices at the end of each quarter. The net impact of the revaluation as at 31 December 2021 on the balance sheet items is entered in the items "Other assets" (asset item 9), "Other liabilities" (liability item 10) and "Revaluation accounts" (liability item 11).

Quarterly financial accounts: 3rd quarter 2021

Households' financial wealth remained stable in the third quarter of 2021

- **Regulated savings deposits were down for the first time in a long while**
- **Private individuals continued to put their money in investment funds**

Over the third quarter of the year 2021, the net financial wealth of private individuals remained more or less stable, at € 1 180.6 billion. The € 5.3 billion rise in investment in financial assets was partly offset by new financial liabilities (+€ 2.4 billion) and partly by other flows of financial assets (-€ 3.7 billion).

As in the previous quarter, private households mainly invested in investment fund shares (+€ 4.8 billion) in the July-September period last year. Sight deposits were up by half a billion euros, which is quite exceptional considering the usual seasonal decline in sight deposits in the third quarter of every year. This unusual rise in deposits can be explained by the sharp drop in regulated savings deposits (-€ 1.4 billion). This is the sharpest decline on a quarterly basis since the third quarter of 2008. It is largely attributable to the news that a medium-sized savings bank was ceasing operations and to the imposition of a ceiling on regulated savings accounts in one major bank since July 2021. Figures already available for the months of October and November then started levelling out. Moreover, as in previous quarters, holdings of fixed-interest securities saw net sales (-€ 1.3 billion).

Lastly, new financial liabilities taken on by private individuals rose by € 2.1 billion, to reach an outstanding figure of € 326.6 billion by 30 September 2021. Mortgage loans increased by € 3 billion, while other forms of credit posted a slight slowdown.

¹ For more information, see: https://www.nbb.be/doc/dq/mip/en/MIP_home.htm.

1. Other flows include price and exchange rate variations. They may also include selective elements such as the reclassification of operations in another sector.
 2. The other flows in sight and other deposits in the third quarter were mainly caused by the statistical reclassification of entities from the sector of non-profit institutions serving households, which are part of the individuals' sector in this table, to the sector of non-financial corporations.
 3. Consists of the other financial instruments as determined by the ESA 2010, i.e. mainly loans, trade credit and other accounts receivable/payable, among which general government assessments.
 4. Consists of the other financial instruments as determined by the ESA 2010, that is other equity, trade credit and other accounts receivable/payable, among which taxes due but not yet paid.

2. Business and consumer surveys

CHART 1 OVERALL SYNTHETIC CURVE
(manufacturing industry, building industry, business-related services and trade)

Source: NBB.

Business barometer dips very slightly in December

- **On the whole, business confidence has hardly changed over the last three months.**
- **In December, the indicator has dropped back considerably in business-related services, confirming November's decline. In the other branches of activity, only marginal changes have been observed: upwards in the manufacturing industry and downwards in the trade sector and the building industry.**

All components of the indicator have deteriorated in business-related services, in particular the outlook for activity in the firms surveyed. Furthermore, the loss of confidence has affected all service activities.

The slight decline in the building industry is mainly explained by a contraction in order books and by lower use being made of available equipment.

In the trade sector, it is the forecasts for employment and orders placed with suppliers that have been revised downwards.

As for the manufacturing industry, the only branch of activity where business confidence has not wavered, the improvement in the indicator is entirely due to a more favourable assessment of stock levels.

The overall smoothed synthetic curve, which reflects the underlying cyclical trend, continues to fall.

CHART 7 CONSUMER CONFIDENCE INDICATOR

Source: NBB.

December brings further loss of consumer confidence

- **The consumer confidence indicator has dropped back for the third time in a row, now down to its lowest level since May. Although still above the long-term average, it has fallen to a level comparable to the prepandemic situation.**
- **Like in November, the decline is mainly attributable to a deterioration of the outlook for the general economic situation and, more particularly, to unemployment.**

Consumers have once again voiced more pessimistic forecasts for the general economic situation, so they have fallen back to a level not seen for a year. In addition, fears of a rise in unemployment over the next twelve months have clearly risen.

On a personal front, households are expecting to be able to save less, while anticipating an improvement in their financial situation.

Sources: EUROSTAT, NEO Calculations: NBB

N.B.: Due to a methodological break in the labor force survey conducted among Belgian households (LFS) from the first quarter of 2017, Eurostat can no longer provide monthly data of the harmonized unemployment rate. Pending a solution, the quarterly averages replace these monthly data.

¹ Annual or quarterly data: average of end-of-month data; monthly data: end-of-month data.

² The suppression of the unemployment control at the end of 2005 makes difficult the comparison of the series before and after 2006.

¹ To convert to indices in base 2004=100, we must use the next coefficients: 1,2240 for general index and 1,2077 for health index. For functional classification: 1,2814 for the food products, 1,2123 for the non-food products, 1,2149 for services and 1,1734 for rents. For the classification by groups of products: 1,2814 for the food products, 1,4214 for tobacco, 1,0370 for clothes and shoes, 1,3835 for housing, water, electricity, 1,1544 for furniture, household equipment, 1,0428 for health expenditure, 1,2351 for transport, 0,8968 for communication, 1,1273 for leisure and culture, 1,2030 for education, 1,2698 for hotels, cafés and restaurant, 1,2800 for other goods and services.

N.B.: The consolidated financial accounts of the general government sub-sectors and the non-consolidated financial account of general government are available on Belgostat Online via the Bank's website www.nbb.be. Unlike the data given in the tables in Chapter 12 on the general national financial accounts for Belgium as a whole, the data in this table are consolidated. The consolidated financial account of a sector corresponds to total net acquisitions of financial assets and net increases in financial liabilities, with the exception of net acquisitions of financial assets and net increases in financial liabilities of which the counterpart is a unit within this sector. Since the consolidated figures on both the assets and liabilities sides are identical by definition, the consolidation has no impact on net lending/net borrowing.

¹ The balance of the financial account is not equal in value to net lending/net borrowing as recorded in the non-financial account, owing to differences between the dates on which transactions are recorded in the two accounts, differences in the sources of information and statistical adjustments.

Source: NBB

N.B.: The non-consolidated financial balance sheet of general government is available on Belgostat Online via the Bank's website "www.nbb.be".

Unlike the figures given in the tables in Chapter 12 on the general national financial accounts for Belgium as a whole, the data shown in this table are consolidated. The consolidated financial wealth account of a sector corresponds to total financial assets and liabilities, with the exception of financial assets and liabilities of which the counterparty is a unit within this sector. Since the consolidated figures on both the assets and liabilities sides are identical by definition, the consolidation has no impact on the net financial wealth.

N.B.: The consolidated financial balance sheet of a sector corresponds to total financial assets and liabilities, with the exception of financial assets and liabilities of which the counterparty is a unit within this sector. Since the consolidated figures on both the assets and liabilities sides are identical by definition, the consolidation has no impact on the net financial wealth.

N.B.: The consolidated gross debt is the debt as defined in European Regulation EC 479/2009 concerning the implementation of the Protocol on the excessive deficit procedure annexed to the Treaty on European Union (Treaty of Maastricht) of 7 February 1992, as modified by Commission Regulation (EU) No 220/2014 of 7 March 2014 amending Council Regulation (EC) No 479/2009 as regards references to the European system of national and regional accounts in the European Union (ESA 2010).

¹ The consolidated gross debt of a sub-sector is obtained by subtracting debts which counterpart are financial assets of other units of this sub-sector (intersectoral consolidation).

² Corresponds to the financial assets of the various sub-sectors of which the counterpart is the debt of another sub-sector of general government. The consolidated gross debt of a sub-sector after deducting the financial assets held in the other sub-sectors determines the contribution of this sub-sector to the consolidated gross debt of general government as a whole.

¹ The breakdown euro/non-euro, on a monthly basis (since 1990), is available on the website of the Bank: www.nbb.be.

² Situation at end of period.

³ Cumulative monthly data.

⁴ Original maturity.

⁵ Since 2002, the Treasury certificates transferred to international organisations are included in the debt at over one year rather than in the debt at up to one year. Since January 2004, the Treasury certificates transferred to IMF are no more included in the official debt of the Treasury.

⁶ Public loans issued by the Treasury and the Road Fund.

⁷ Except the Treasury certificates transferred to international organisations.

⁸ Including the shareholder's equity on the Post.

Source: NBB

¹ From July 2009 onwards: Subdivision of the serie "Securities of euro area residents denominated in euro" in two sub-series: "Securities held for monetary policy purposes" and "Other securities".² From 2002 onwards: According to the accounting regime chosen by the Eurosystem on the issue of euro banknotes, a share of 8 % of the total value of the euro banknotes in circulation is allocated to the ECB on a monthly basis. The counterpart of this adjustment is disclosed as an "Intra-Eurosystem liability related to banknote issue". The remaining 92 % of the value of the euro banknotes in circulation are allocated to the NCBs on a monthly basis too, whereby each NCB shows in its balance sheet a share of the euro banknotes issued corresponding to its paid-up share in the ECB's capital (Capital Share Mechanism or CSM).³ The difference between the value of the euro banknotes allocated to the NCB according to the aforementioned accounting regime, and the value of euro banknotes put into circulation, is also disclosed as an "Intra-Eurosystem claim/liability related to banknote issue".³ From 2001 onwards: Split of the old serie "Other claims" into two series "Other liabilities" and "Other liabilities to euro area credit institutions, denominated in euro".

¹ From 2009 onwards: Subdivision of the serie "Securities of euro area residents denominated in euro" in two sub-series: "Securities held for monetary policy purposes" and "Other securities".² From the financial year 2003 onwards, the other claims and liabilities within the Eurosystem are presented on a net basis. As a result, the figures from the financial year 2002 were adapted to ensure the comparability of the annual accounts (see also section 9.3 on the liabilities side).

Source: NBB Calculations: NBB

N.B.: Reporting based on the company's position for credit institutions governed by Belgian law and on territorial position for branches of credit institutions governed by foreign law established in Belgium.

¹ The breakdown is not known for the branches of the credit institutions governed by the law of another Member State of the European Union or for similar branches.² Since credit institutions use different accounting regimes in the trading portfolio for the interest rate swaps, and the options on variable yield securities, only the net financial results of trading in interest-rate transactions and variable yield securities are published.

N.B.: Including non-profit institutions serving Belgian households.

¹ Up to December 2002: inclusive lending for house purchase up to one year.

² Outstanding amounts of securitized or otherwise transferred loans also include loans transferred to euro area credit institutions if the transferring credit institution is still responsible for collecting the principal and interest of the debtors. Note that these transferred loans are not included in the series published by the ECB.

¹ New definitions for non-financial and financial corporations in accordance with the new ESA2010 methodology and reclassifications of institutional units in the government sector following a recommendation by Eurostat have caused important changes in the outstanding amounts in December 2014. Those reclassifications do not affect the actual flows.

² Outstanding amounts of securitized or otherwise transferred loans also include loans transferred to euro area credit institutions if the transferring credit institution is still responsible for collecting the principal and interest of the debtors. Note that these transferred loans are not included in the series published by the ECB.

¹ New definitions for non-financial and financial corporations in accordance with the new ESA2010 methodology and reclassifications of institutional units in the government sector following a recommendation by Eurostat have caused important changes in the outstanding amounts in December 2014. Those reclassifications do not affect the actual flows.

² Figures only available on a quarterly basis - see quarterly tables.

³ Outstanding amounts of securitized or otherwise transferred loans also include loans transferred to euro area credit institutions if the transferring credit institution is still responsible for collecting the principal and interest of the debtors. Note that these transferred loans are not included in the series published by the ECB.

¹ New definitions for non-financial and financial corporations in accordance with the new ESA2010 methodology and reclassifications of institutional units in the government sector following a recommendation by Eurostat have caused important changes in the outstanding amounts in December 2014. Those reclassifications do not affect the actual flows.

² Including special deposits, regulated savings deposits and deposits linked to mortgage loans

N.B.: From January 2002 onwards, the Belgian contribution to the monetary aggregates of the eurozone excludes currency in circulation.

From June 2010, the Repurchase agreements, and consequently M3, exclude the Repurchase agreements with Central counterparties (CCPs). Hence, reclassifications that have an impact on the list of Central counterparties (CCPs), might cause breaks in the time series.

N.B.: Is considered to be the beneficiary, the enterprise or individual that has been granted the credit to, and which consequently is in the position to have the right of initiative to use it. He can exercise this right by contracting debts with the financial institutions or by handing over commercial credits to third parties. New definitions for non-financial and financial corporations in accordance with the new ESA2010 methodology and reclassifications of institutional units in the government sector following a recommendation by Eurostat have caused important changes in the outstanding amounts in December 2014.

Sources: NBB, Central Office for Credits to Companies

N.B.: Is considered to be the beneficiary, the enterprise or individual that has been granted the credit to, and which consequently is in the position to have the right of initiative to use it. He can exercise this right by contracting debts with the financial institutions or by handing over commercial credits to third parties. New definitions for non-financial and financial corporations in accordance with the new ESA2010 methodology and reclassifications of institutional units in the government sector following a recommendation by Eurostat have caused important changes in the outstanding amounts in December 2014.

N.B.: According to a survey conducted among credit institutions, insurance companies and mortgage companies.

The data indicate a trend and do not reflect all applications for mortgage credit or the outstanding amount of these loans. From 1995 onwards the concept of "mortgage credit" refers to the Law of 4th August 1992 concerning mortgage credit, and excludes all mortgage credit contracted for commercial purposes.

Bibliographical reference: Bulletin de la Banque nationale de Belgique, LXIXth year, number 9, September 1994.

N.B.: The definition of credit has been extended from the first semester 2011 onwards within the scope of the law of the 13th of June 2010 modifying the law of the 12th of June 1991 relative to consumer credit.

¹ Until 1993, excluding payments; from 1994 onwards, including the claims which are recorded under the item "doubtful debtors" under creditors, but excluding transfers to credit insurance companies.² Until December 1993 inclusive, only personal loans are included.

Bibliographical reference: Bulletin de la Banque nationale de Belgique, LXIXth year, number 9, September 1994.

General remarks

In the various tables, the totals shown can differ from the sum of the items as a result of roundings.

The [publication schedule](#) for the most important economic statistics compiled by the Bank and the NAI is given on the Bank's website.

In order to meet the obligations imposed by the SDDS (the IMF's Special Data Dissemination Standard), this schedule also covers all the statistics included in the SDDS. Publication date are those given by the institution responsible for compiling the statistics; some of these institutions publish via their own media more detailed schedules for statistics than those given on the Bank's website.

Conventional signs

e	estimation
p	provisional
-	the data does not exist or is meaningless
n.	not available
p.m.	pro memoria
0 or 0,0	zero or less than the half of the last chosen unit
