2.1.1 OVERALL SYNTHETIC CURVE AND COMMENT

CHART 1 OVERALL SYNTHETIC CURVE
(manufacturing industry, building industry, business-related services and trade)

Source: NBB.

Business barometer continues its slow decline in February

- **As in the previous two months, business confidence has dipped a little in February, dropping to its lowest level since April 2021.**
- **The business climate has deteriorated in the business-related services sector, after seeing some improvement in January, and has got marginally worse in the manufacturing industry. By contrast, the economic situation has recovered in the trade sector and the building industry.**

Entrepreneurs in the business-related services sector remain hesitant, alternating between renewal and loss of confidence. This month's decline is attributable to a big downward revision of the outlook for general market demand. Company managers surveyed also appeared a bit more negative about the expected course of their own business activity.

As for the slight downturn observed in the manufacturing industry, this is based on a less favourable assessment of the current situation, whether total order books or stock levels are concerned.

The improvement in trade, which comes on the back of three consecutive falls, stems from more positive demand forecasts and projections for orders placed with suppliers. From a sectoral point of view, the restoration of confidence has only affected furniture and textile retailers.

In the building industry, company managers are taking a more positive view of recent trends in equipment used and in terms of total order books, the level of which has also been assessed more favourably considering the time of year.

The overall smoothed synthetic curve, which reflects the underlying cyclical trend, has dropped slightly

CHART 7 CONSUMER CONFIDENCE INDICATOR

Source: NBB.

New rise in consumer confidence in February

- **The improvement stems mainly from the clearly more favourable outlook for labour market developments.**
- **Households have also raised their savings intentions, for the first time in eight months.**

Fears of a rise in unemployment over the next twelve months have once again dwindled. At the same time, forecasts about the general economic situation in Belgium have firmed up very slightly.

On the personal front, households are planning to save more, despite a further expected deterioration in their financial situation most likely due to the sharp pick-up in inflation.

Sources: EUROSTAT, NEO Calculations: NBB

N.B.: Due to a methodological break in the labor force survey conducted among Belgian households (LFS) from the first quarter of 2017, Eurostat can no longer provide monthly data of the harmonized unemployment rate. Pending a solution, the quarterly averages replace these monthly data.

¹ Annual or quarterly data: average of end-of-month data; monthly data: end-of-month data.

² The suppression of the unemployment control at the end of 2005 makes difficult the comparison of the series before and after 2006.

¹ To convert to indices in base 2004=100, we must use the next coefficients: 1,2240 for general index and 1,2077 for health index. For functional classification: 1,2814 for the food products, 1,2123 for the non-food products, 1,2149 for services and 1,1734 for rents. For the classification by groups of products: 1,2814 for the food products, 1,4214 for tobacco, 1,0370 for clothes and shoes, 1,3835 for housing, water, electricity, 1,1544 for furniture, household equipment, 1,0428 for health expenditure, 1,2351 for transport, 0,8968 for communication, 1,1273 for leisure and culture, 1,2030 for education, 1,2698 for hotels, cafés and restaurant, 1,2800 for other goods and services.

¹ The breakdown euro/non-euro, on a monthly basis (since 1990), is available on the website of the Bank: www.nbb.be.

² Situation at end of period.

³ Cumulative monthly data.

⁴ Original maturity.

⁵ Since 2002, the Treasury certificates transferred to international organisations are included in the debt at over one year rather than in the debt at up to one year. Since January 2004, the Treasury certificates transferred to IMF are no more included in the official debt of the Treasury.

⁶ Public loans issued by the Treasury and the Road Fund.

⁷ Except the Treasury certificates transferred to international organisations.

⁸ Including the shareholder's equity on the Post.

Source: NBB

¹ From July 2009 onwards: Subdivision of the serie "Securities of euro area residents denominated in euro" in two sub-series: "Securities held for monetary policy purposes" and "Other securities".² From 2002 onwards: According to the accounting regime chosen by the Eurosystem on the issue of euro banknotes, a share of 8 % of the total value of the euro banknotes in circulation is allocated to the ECB on a monthly basis. The counterpart of this adjustment is disclosed as an "Intra-Eurosystem liability related to banknote issue". The remaining 92 % of the value of the euro banknotes in circulation are allocated to the NCBs on a monthly basis too, whereby each NCB shows in its balance sheet a share of the euro banknotes issued corresponding to its paid-up share in the ECB's capital (Capital Share Mechanism or CSM).³ The difference between the value of the euro banknotes allocated to the NCB according to the aforementioned accounting regime, and the value of euro banknotes put into circulation, is also disclosed as an "Intra-Eurosystem claim/liability related to banknote issue".³ From 2001 onwards: Split of the old serie "Other claims" into two series "Other liabilities" and "Other liabilities to euro area credit institutions, denominated in euro".

N.B.: Including non-profit institutions serving Belgian households.

¹ Up to December 2002: inclusive lending for house purchase up to one year.

² Outstanding amounts of securitized or otherwise transferred loans also include loans transferred to euro area credit institutions if the transferring credit institution is still responsible for collecting the principal and interest of the debtors. Note that these transferred loans are not included in the series published by the ECB.

¹ New definitions for non-financial and financial corporations in accordance with the new ESA2010 methodology and reclassifications of institutional units in the government sector following a recommendation by Eurostat have caused important changes in the outstanding amounts in December 2014. Those reclassifications do not affect the actual flows.

² Outstanding amounts of securitized or otherwise transferred loans also include loans transferred to euro area credit institutions if the transferring credit institution is still responsible for collecting the principal and interest of the debtors. Note that these transferred loans are not included in the series published by the ECB.

N.B.: Monetary aggregates comprise monetary liabilities of MFIs and central government (Post Office, Treasury) vis-à-vis non-MFI euro area residents excluding central government. From June 2010, the Repurchase agreements, and consequently M3, exclude the Repurchase agreements with Central counterparties (CCPs).

N.B.: From January 2002 onwards, the Belgian contribution to the monetary aggregates of the eurozone excludes currency in circulation.

From June 2010, the Repurchase agreements, and consequently M3, exclude the Repurchase agreements with Central counterparties (CCPs). Hence, reclassifications that have an impact on the list of Central counterparties (CCPs), might cause breaks in the time series.

N.B.: According to a survey conducted among credit institutions, insurance companies and mortgage companies.

The data indicate a trend and do not reflect all applications for mortgage credit or the outstanding amount of these loans. From 1995 onwards the concept of "mortgage credit" refers to the Law of 4th August 1992 concerning mortgage credit, and excludes all mortgage credit contracted for commercial purposes.

Bibliographical reference: Bulletin de la Banque nationale de Belgique, LXIXth year, number 9, September 1994.

General remarks

In the various tables, the totals shown can differ from the sum of the items as a result of roundings.

The [publication schedule](#) for the most important economic statistics compiled by the Bank and the NAI is given on the Bank's website.

In order to meet the obligations imposed by the SDDS (the IMF's Special Data Dissemination Standard), this schedule also covers all the statistics included in the SDDS. Publication date are those given by the institution responsible for compiling the statistics; some of these institutions publish via their own media more detailed schedules for statistics than those given on the Bank's website.

Conventional signs

e	estimation
p	provisional
-	the data does not exist or is meaningless
n.	not available
p.m.	pro memoria
0 or 0,0	zero or less than the half of the last chosen unit
