New Release of OneGate in test environment

The new release of OneGate for the PST (Payments Statistics) domain is now available in the test environment. This version contains all updates as described in infofiches 34 and 34bis, and will be used in the production environment for the collection of the 2016 statistical data.

The test environment can be reached by clicking the following link or by copying the link into your browser:

https://onegate-standard-test.nbb.be/my.policy

The test userids and passwords used last year are still valid. Reporting agents that wish to obtain a (new) userid and/or (renewed) password can request this by simple mail message to the address Access.Onegate@nbb.be (please indicate your company number and the PST domain).

The main attention points with regards to the preparation for the 2016 data collection are:

New Check 1:   (Table 5) - .Number of offices
Field : 5001900, 5002300, 5002700 and 5003100

New Check 2:   (Table 6) – Total number of cards

6001600 must be equal or greater than 6001000 or 6000200 or 6000300

The reporting agent can add or update the 2016 data directly into the OneGate screens. Next to this manual input, a second option is to download the 2016 templates (either in CSV or XML format) as published on the NBB website (www.nbb.be => Statistics => OneGate => Help & Documentation => Documentation). This will provide you with the valid file structure for an upload of the 2016 data into OneGate: the 2016 data will be entered into the third column (in CSV) or into the DATA-tag (in XML). The data for previous year (2015) do not have to be reported, as OneGate will copy them from the internal OneGate db. After completion of all 2016 data, the CSV or XML file can again be uploaded into OneGate 2016.

New Release of OneGate in test environment

The reporting agents should try to avoid using Excel to enter data (see also infofiche 11), as the Belgian decimal settings in Excel can provoke problems when converting.

Please note that the new templates are published on the NBB website and ready for use (see also infofiche 35).

We encourage the reporting agents to test this new version in the test environment.

The new OneGate version in the production environment will be available as from 1 March 2017.

The deadline for reporting the 2016 production Payments Statistics data is **28 April 2017** *(to be confirmed by ECB)*!
