

Hoe activeer ik een NBB-certificaat?

1. Ga naar <https://xenroll.nbb.be/>

2. Klik op "nbb enrollment"

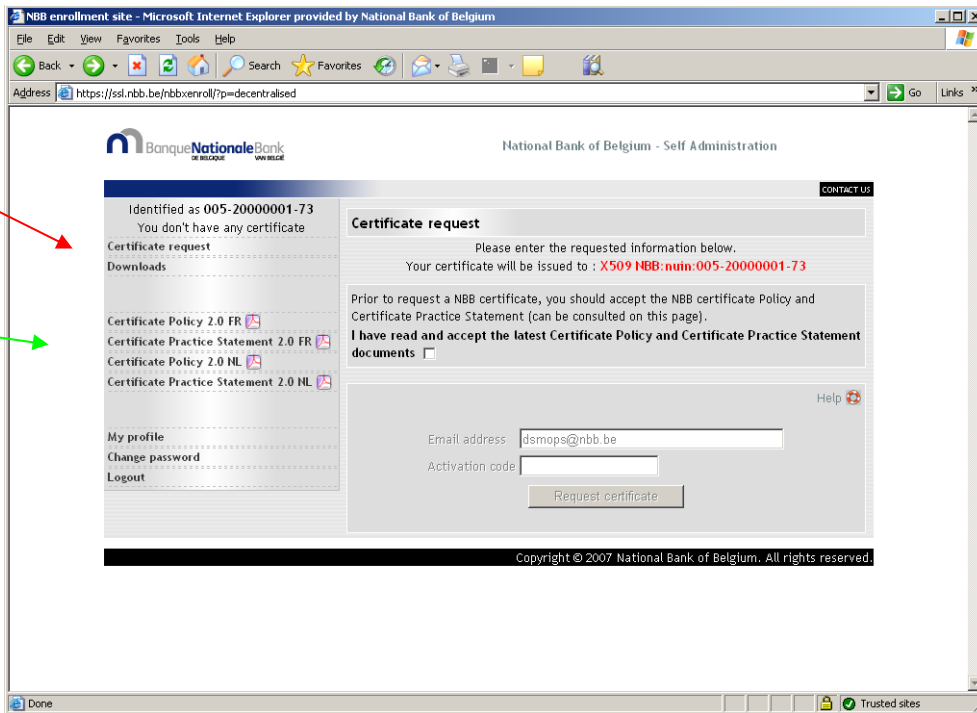

3. Breng de ontvangen Username (=NUIN) en password in en klik op <Log In>

The screenshot shows a web browser window displaying the National Bank of Belgium's self-administration page. The page title is "National Bank of Belgium - Self Administration". The main content area is titled "Password Change Request" and contains the following text: "005-2000001-73, please change your current password before continuing." Below this text are three input fields: "Old password", "New password", and "Confirm password". At the bottom of the form are two buttons: "Change Password" and "Clear this form". The page footer contains the text "Copyright © 2005 National Bank of Belgium. All rights reserved."

4. Tik in de zone "Old password" opnieuw het van de Nationale Bank ontvangen paswoord in, Kies een nieuw paswoord en tik dit achtereenvolgens in in de zones "New password" en "Confirm password".
Klik op <Change password>

The screenshot shows the same web browser window as the previous one, but now displaying the "Password Change Information" page. The page title is "National Bank of Belgium - Self Administration". The main content area is titled "Password Change Information" and contains the following text: "005-2000001-73, your new password has been set. Use this new password the next time you log into your account". Below this text is a single button labeled "Continue". The page footer contains the text "Copyright © 2005 National Bank of Belgium. All rights reserved."

5. Klik op "Continue"

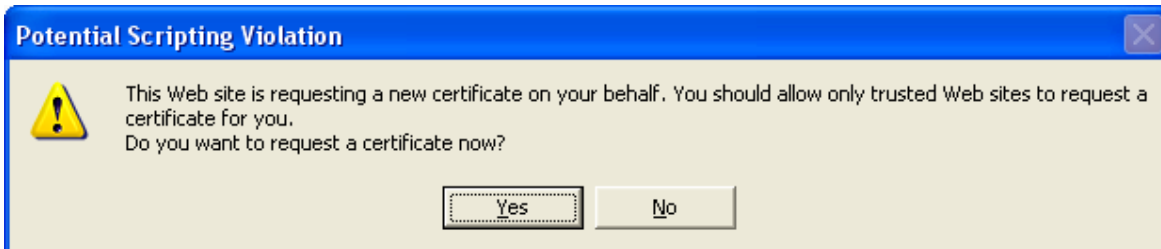

6. Klik op "Certificate request"

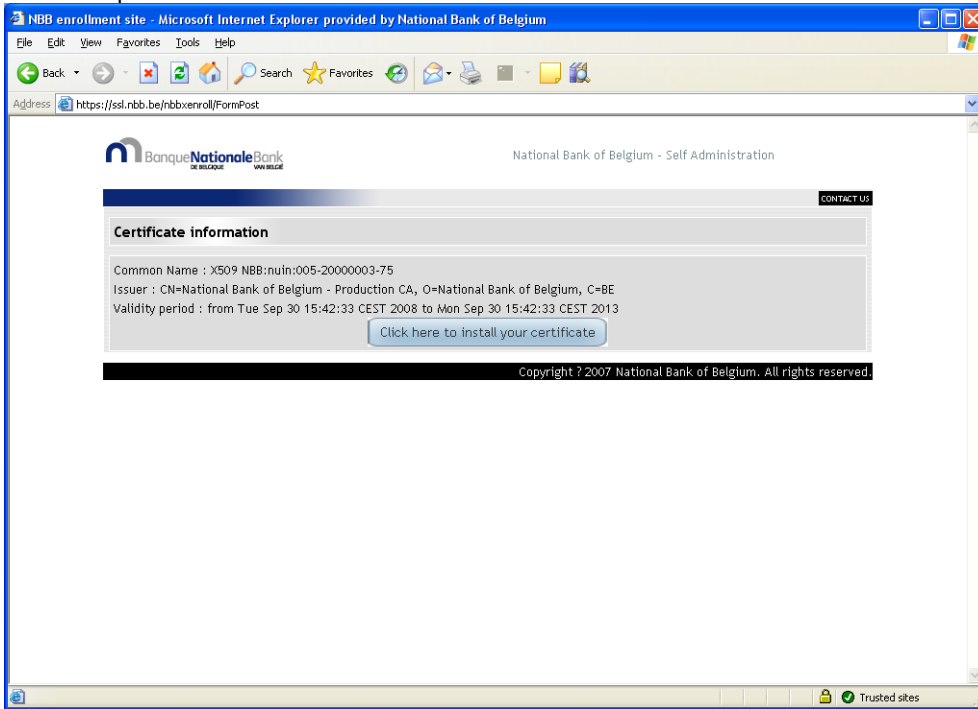

Stip <I have read and accept the latest Certificate Policy and Certificate Practice Statement documents> aan, na lezing van de PDF-documenten links

Vul in de zone <Activation code> de activeringscode in

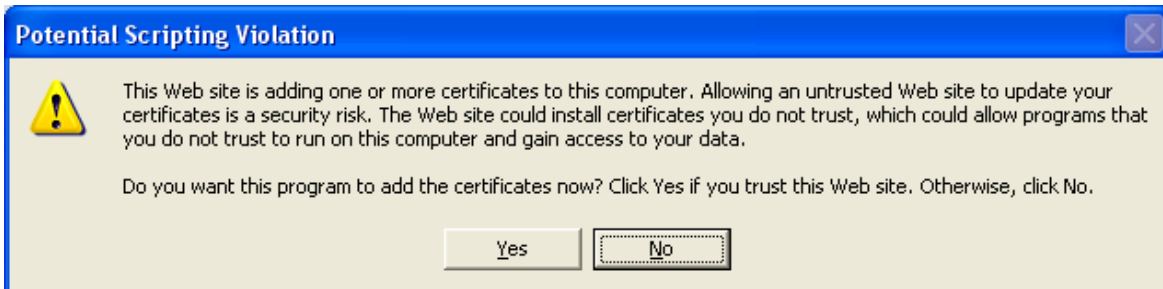

Klik op <Request certificate>

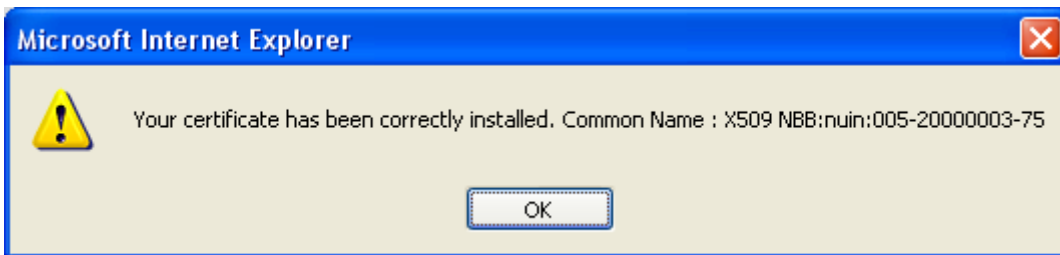

7. Klik op <Yes>

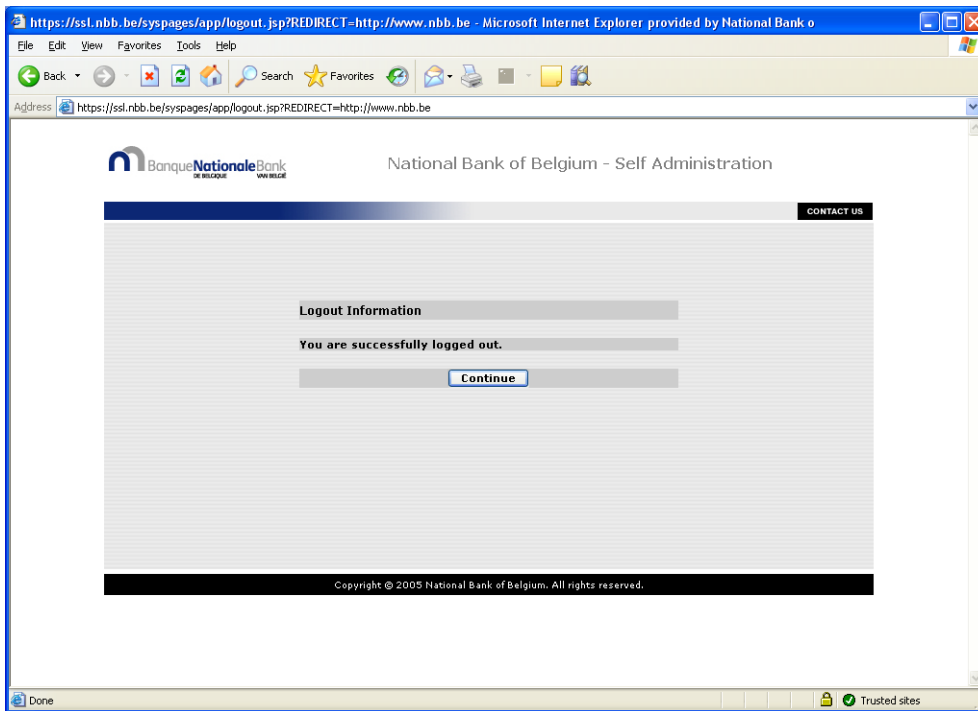

8. Klik op <Click here to install your certificate>

9. Klik op <Yes>

10. Klik op <OK> en vervolgens op <logout> in het hoofdscherm

11. Klik op <Continue>
