2.1 MONTHLY BUSINESS SURVEYS: NATIONAL RESULTS

2.1.1 OVERALL SYNTHETIC CURVE AND COMMENT

Chart 1

Overall synthetic curve

(manufacturing industry, building industry, business-related services and trade)

Source: NAI.

Erosion of business confidence continues in October

- **The deterioration of the business climate is most significant in the manufacturing industry although the building industry is also affected. The confidence indicator improved however in the business-related services and trade sectors.**
- **Reflecting the slowdown observed for several months in the manufacturing industry, production capacity utilisation contracted sharply.**

For the third consecutive month, business confidence has declined in the manufacturing industry. All underlying components of the indicator are down, in particular employment expectations and stock levels, with the latter deemed higher than normal by a greater number of business leaders. It's necessary to go back to June 2020, the middle of the pandemic, to find evidence of a similar assessment of stock levels.

The loss of confidence is also affecting, albeit to a lesser degree, the building industry. The most marked movements this month - a sharp fall in demand forecasts and a recent improvement in order books - offset the previous month's observations to the contrary. The trend in the utilisation of equipment continued its slight downward trajectory and, for the second consecutive month, the assessment of order books, having regard to the time of year, deteriorated.

After a clear worsening last month, business sentiment improved somewhat in the trade sector, influenced by upgraded employment expectations which were, however, offset by a further degradation in demand forecasts.

The improved morale of business leaders was more noticeable in the business-related services sector, after four consecutive months of declining sentiment. They expressed more optimism about both their current level of activity and their expectations for the future. However, they were more cautious about the future direction of general market demand.

The overall smoothed synthetic curve, which reflects the underlying economic trend, continues to decline.

Finally, the results of the quarterly capacity survey in the manufacturing industry revealed a sharp contraction in production capacity utilisation, reflecting the slowdown observed in this sector for several months. Adjusted for seasonal variations, this rate stood at 76.2% in October, compared to 80.7% in July, and was down in all industrial branches of activity.

Chart 7

Consumer confidence indicator

Source: NAI.

Consumer confidence stabilises at an extremely low level

- **In October, consumer sentiment has not improved and remains at the same level as in September, at which time a sharp drop was noted.**

Households are still extremely concerned, although somewhat less pessimistic about the general economic outlook for Belgium over the next twelve months.

At the personal level, consumer expectations of their financial situation only marginally improved and remain at a low level. Households have again significantly lowered their savings intentions, confirming the previous month's sharp decline.

Sources: EUROSTAT, NEO Calculations: NBB

N.B.: Due to a methodological break in the labor force survey conducted among Belgian households (LFS) from the first quarter of 2017, Eurostat can no longer provide monthly data of the harmonized unemployment rate. Pending a solution, the quarterly averages replace these monthly data.

¹ Annual or quarterly data: average of end-of-month data; monthly data: end-of-month data.

² The suppression of the unemployment control at the end of 2005 makes difficult the comparison of the series before and after 2006.

¹ The breakdown euro/non-euro, on a monthly basis (since 1990), is available on the website of the Bank: www.nbb.be.

² Situation at end of period.

³ Cumulative monthly data.

⁴ Original maturity.

⁵ Since 2002, the Treasury certificates transferred to international organisations are included in the debt at over one year rather than in the debt at up to one year. Since January 2004, the Treasury certificates transferred to IMF are no more included in the official debt of the Treasury.

⁶ Public loans issued by the Treasury and the Road Fund.

⁷ Except the Treasury certificates transferred to international organisations.

⁸ Including the shareholder's equity on the Post.

Source: NBB

¹ From July 2009 onwards: Subdivision of the serie "Securities of euro area residents denominated in euro" in two sub-series: "Securities held for monetary policy purposes" and "Other securities".² From 2002 onwards: According to the accounting regime chosen by the Eurosystem on the issue of euro banknotes, a share of 8 % of the total value of the euro banknotes in circulation is allocated to the ECB on a monthly basis. The counterpart of this adjustment is disclosed as an "Intra-Eurosystem liability related to banknote issue".
The remaining 92 % of the value of the euro banknotes in circulation are allocated to the NCBs on a monthly basis too, whereby each NCB shows in its balance sheet a share of the euro banknotes issued corresponding to its paid-up share in the ECB's capital (Capital Share Mechanism or CSM).³ The difference between the value of the euro banknotes allocated to the NCB according to the aforementioned accounting regime, and the value of euro banknotes put into circulation, is also disclosed as an "Intra-Eurosystem claim/liability related to banknote issue".³ From 2001 onwards: Split of the old serie "Other claims" into two series "Other liabilities" and "Other liabilities to euro area credit institutions, denominated in euro".

N.B.: Including non-profit institutions serving Belgian households.

¹ Up to December 2002: inclusive lending for house purchase up to one year.² Outstanding amounts of securitized or otherwise transferred loans also include loans transferred to euro area credit institutions if the transferring credit institution is still responsible for collecting the principal and interest of the debtors. Note that these transferred loans are not included in the series published by the ECB.

N.B.: Monetary aggregates comprise monetary liabilities of MFIs and central government (Post Office, Treasury) vis-à-vis non-MFI euro area residents excluding central government. From June 2010, the Repurchase agreements, and consequently M3, exclude the Repurchase agreements with Central counterparties (CCPs).

N.B.: From January 2002 onwards, the Belgian contribution to the monetary aggregates of the eurozone excludes currency in circulation.

From June 2010, the Repurchase agreements, and consequently M3, exclude the Repurchase agreements with Central counterparties (CCPs). Hence, reclassifications that have an impact on the list of Central counterparties (CCPs), might cause breaks in the time series.

¹ The total number of borrowers is not equal to the sum of the number of borrowers per type of credit. A borrower who has contracted several different types of loan is counted in each of the categories but only once in the total number.

N.B.: According to a survey conducted among credit institutions, insurance companies and mortgage companies.

The data indicate a trend and do not reflect all applications for mortgage credit or the outstanding amount of these loans. From 1995 onwards the concept of "mortgage credit" refers to the Law of 4th August 1992 concerning mortgage credit, and excludes all mortgage credit contracted for commercial purposes.

Bibliographical reference: Bulletin de la Banque nationale de Belgique, LXIXth year, number 9, September 1994.

General remarks

In the various tables, the totals shown can differ from the sum of the items as a result of roundings.

The [publication schedule](#) for the most important economic statistics compiled by the Bank and the NAI is given on the Bank's website.

In order to meet the obligations imposed by the SDDS (the IMF's Special Data Dissemination Standard), this schedule also covers all the statistics included in the SDDS. Publication date are those given by the institution responsible for compiling the statistics; some of these institutions publish via their own media more detailed schedules for statistics than those given on the Bank's website.

Conventional signs

e	estimation
p	provisional
-	the data does not exist or is meaningless
n.	not available
p.m.	pro memoria
0 or 0,0	zero or less than the half of the last chosen unit
