

Payments Statistics info

Payments Statistics info

OneGate for 2015 payments data collection available in Production as from 1 March

The OneGate reporting tool for the 2015 Payments Statistics will be available as from 1 March 2016. From that date on, the reporting agents can upload the 2015 Payments Statistics data. The deadline for delivering the data to the NBB is Friday 29 April!

The reporting tool 2015 will allow comparison with the 2014 data in a separate “for information only” column. The 2014 data are not accessible as they are copied from the internal 2014 database. When comparing 2015 to 2014, the reporting agents should take into account that the 2014 flow data covered only 6 months. Furthermore, the reporting agents should keep in mind that OneGate 2015 contains an additional package of mathematical and logical checks (as described in infofiche 26).

The delivery protocol published on the OneGate website (see also infofiche 28) is now up to date for the 2015 data production round.
