## Update of the validation rules for PST-3

During the testing of the PST-3 reporting formats, reporting agents have noticed errors in two validation rules:

1. Validation rule VAL03 for data set PCN (Payment Cards Numbers) did contain double counting and has now been amended.
2. The validation rules for data set PAY contain updated checks on the role of the reporting agent

The template has also been updated to amend a textual error in the folder PCP issuer “details”: here the heading of column C has been updated to reflect the counterpart area of the acquirer.

The updated validation rules (folder “validation checks”) and the textual update in table PCP issuers “details” are highlighted in red in the template which is now available on our website.
