Dear NBB-SSS User Committee Chairman and members,

Currently, the AMI-SeCo Belgian National Stakeholders Group (BENSG) is holding a survey among its members on T2S CR-653 Partial Release functionality. During the last meeting of the AMI-SeCo in June 2018, AMI-SeCo members supported organising a workshop to ensure an optimal implementation of the T2S CR-653 Partial release functionality in T2S for the T2S community. More details about this functionality can be found in the change request on the T2S website: [https://www.ecb.europa.eu/paym/t2s/progress/pdf/crg/t2s\\_0653\\_urd.pdf](https://www.ecb.europa.eu/paym/t2s/progress/pdf/crg/t2s_0653_urd.pdf)

In preparation of the workshop on CR-653, scheduled for 27 September 2018, the ECB team is conducting a survey on the intended use of the partial release functionality and the key determinants for its optimal implementation.

Some of you have received the questionnaire as BENSG member. We think it is useful to extend the survey to the full NBB-SSS User Committee as some members explicitly expressed strong support for the CR in the past. The survey allows the T2S workshop to collect views on the reasons of support. You are therefore kindly requested to complete the attached questionnaire by 30/8/2018 cob. We will group the response and submit to the ECB on 31/8/2018. Please note that for confidentiality reasons the ECB will not publish individual responses to the survey. Where applicable, responses to the survey will be aggregated per type of institution.

Thank you in advance.

Kind regards,

Koen Geenen
