

Comments on: Multi-Product Exporters, Carry-Along Trade and the Margins of Trade

by Andrew B. Bernard, Ilke Van Beveren and Hylke
Vandenbussche

J. Peter Neary

University of Oxford and CEPR

National Bank of Belgium International Conference 2010
“International Trade: Threats and Opportunities in a Globalized World”
Brussels, October 15, 2010

Outline of My Comments

- 1 Summary
- 2 Background
- 3 Theoretical Explanations
- 4 Comments on Data and Empirics
- 5 Conclusion

Summary

- Contributes to growing literature on multi-product firms
 - Belgian data more disaggregated, better concorded
 - Empirical patterns broadly similar to those for other countries

Summary

- Contributes to growing literature on multi-product firms
 - Belgian data more disaggregated, better concorded
 - Empirical patterns broadly similar to those for other countries
- Presents a new stylized fact: Importance of “Carry-Along Trade”
 - Especially important for larger, more productive firms

Summary

- Contributes to growing literature on multi-product firms
 - Belgian data more disaggregated, better concorded
 - Empirical patterns broadly similar to those for other countries
- Presents a new stylized fact: Importance of “Carry-Along Trade”
 - Especially important for larger, more productive firms
- Speculates about its causes and consequences
 - Stimulating!

Background

- The Firm-Level Empirical Revolution in Trade: 2+ Waves

Background

- The Firm-Level Empirical Revolution in Trade: 2+ Waves
 - ① Exporters are few, larger, more productive, pay higher wages, ...
 - Bernard-Jensen (1999)

Background

- The Firm-Level Empirical Revolution in Trade: 2+ Waves
 - ① Exporters are few, larger, more productive, pay higher wages, ...
 - Bernard-Jensen (1999)
 - ② Distribution of exporters is bimodal: Superstar firms matter
 - Bernard-Redding-Schott (2006 onwards)

Background

- The Firm-Level Empirical Revolution in Trade: 2+ Waves
 - ① Exporters are few, larger, more productive, pay higher wages, ...
 - Bernard-Jensen (1999)
 - ② Distribution of exporters is bimodal: Superstar firms matter
 - Bernard-Redding-Schott (2006 onwards)
 - ③ “Complex globalization strategies”

Background

 - Bernard-Redding-Schott (2010): product-market-specific shocks
 - Oligopoly versus monopolistic competition?
 - Cost- versus quality-based competition?
 - Eckel-Iacovone-Javorcik-Neary (2010)

Theoretical Explanations

- Authors' suggestions:
 - Pure intermediary
 - Complementary products
 - Inputs and parts
 - Branded products

Theoretical Explanations

- Authors' suggestions:
 - Pure intermediary
 - Complementary products
 - Inputs and parts
 - Branded products

Can these explain pure CAT?

Theoretical Explanations

- Authors' suggestions:
 - Pure intermediary
 - Complementary products
 - Inputs and parts
 - Branded products

Can these explain pure CAT?

- Affiliate sales
 - CAT more important for multinationals and foreign-owned firms

Theoretical Explanations

- Authors' suggestions:
 - Pure intermediary
 - Complementary products
 - Inputs and parts
 - Branded products

Can these explain pure CAT?

- Affiliate sales
 - CAT more important for multinationals and foreign-owned firms
- Manufacturing versus distribution
 - Recent work on distribution-based FDI: Javorcik et al. (2009, 2010), Krautheim (2009), Nelson (2009)

Comments on Data and Empirics

- “startling, previously unknown facts”

Comments on Data and Empirics

- “startling, previously unknown facts”
 - Peculiar features of the Prodcop database?

Comments on Data and Empirics

- “startling, previously unknown facts”
 - Peculiar features of the Prodcorn database?
- Are CAT products core or marginal products?

Comments on Data and Empirics

- “startling, previously unknown facts”
 - Peculiar features of the Prodcod database?
- Are CAT products core or marginal products?
- Are CAT-intensive exporters also major importers?

Conclusion

- Is Belgium special?

Conclusion

- Is Belgium special?
- Big picture implications?

Conclusion

- Is Belgium special?
- Big picture implications?
 - Manufacturing versus services: making things versus carrying things?

Conclusion

- Is Belgium special?
- Big picture implications?
 - Manufacturing versus services: making things versus carrying things?
 - Complex Globalization Strategies

Conclusion

- Is Belgium special?
- Big picture implications?
 - Manufacturing versus services: making things versus carrying things?
 - Complex Globalization Strategies
- Empirical implications?

Conclusion

- Is Belgium special?
- Big picture implications?
 - Manufacturing versus services: making things versus carrying things?
 - Complex Globalization Strategies
- Empirical implications?
- Next Steps?

Conclusion

- Is Belgium special?
- Big picture implications?
 - Manufacturing versus services: making things versus carrying things?
 - Complex Globalization Strategies
- Empirical implications?
- Next Steps?
 - Carry on trading ...

Conclusion

- Is Belgium special?
- Big picture implications?
 - Manufacturing versus services: making things versus carrying things?
 - Complex Globalization Strategies
- Empirical implications?
- Next Steps?
 - Carry on trading ...
 - Carry on thinking ... !
