Main macroeconomic indicators in the euro area and other major economies	5
Gdp and main categories of expenditure, by volume	7
Deflators of gdp and the main categories of expenditure	9
Gdp and the main categories of expenditure, at current prices	10
Value added of the various branches of activity, by volume	12
Labour market	13
Employment rate	14
Unemployment rate	15
Inactivity rate	16
Employment rate: regional details	17
Unemployment rate: regional details	18
Inactivity rate: regional details	19
Harmonised index of consumer prices	20
Summary account of households, at current prices	21
Summary account of corporations, at current prices	22
Summary account of the rest of the world, at current prices	23
Revenue, expenditure and overall balance of general government	24
Overall balance of general government, by sub-sector	25
Consolidated gross debt of general government	26
Determinants of the change in the consolidated gross debt of general government	27
Current and capital transactions according to the balance of payments	28
Formation of financial assets and new financial liabilities of households	29
Formation of financial assets and new financial liabilities of non-financial corporations	30
Formation of financial assets and new financial liabilities of monetary financial institutions	31
Formation of assets and new liabilities of financial intermediaries other than monetary institutions	32
Overview of institutions subject to National Bank of Belgium supervision	33
Balance sheet structure of credit institutions governed by belgian law by product	34
Main components of the income statement of credit institutions governed by belgian law	35
Main components of insurance companies' balance sheet	36
Main components of insurance companies income statement	37
Net issues of securities by financial and non-financial corporations and general government	38
Interest rates	39

TABLE 1 MAIN MACROECONOMIC INDICATORS IN THE EURO AREA AND OTHER MAJOR ECONOMIES (1/2)

1 These inactivity rates are calculated on the basis of the harmonised data taken from the labour force survey.

2 Average of the first three quarters. As a result of the reform of the labor force survey, in which a rotary panel was introduced in particular, the results for 2017 are not fully comparable with those of the previous years.
For more information, see: <https://statbel.fgov.be/en>.

3 Except Croatia which joined the EU on 1 July 2013.

1 The data in this table are calculated in gross terms, i.e. before deduction of consumption of fixed capital.

2 Remuneration (excluding that of owner entrepreneurs), including social security contribution and civil service pensions.

3 These are net amounts, i.e. the difference between incomes or transfers received from other sectors and those paid to other sectors, excluding transfers in kind.

4 Data deflated by means of the household final consumption expenditure deflator.

5 In % of gross disposable income in the broad sense, i.e. including the changes in households' entitlements to additional pension accruing in the context of an occupational activity.

6 These are net amounts, i.e. the difference between transfers received from other sectors and those paid to other sectors, including net acquisitions of non-financial non-produced assets and net acquisitions of valuables.

Sources: NAI, NBB.

1 In accordance with the national accounts conventions, transactions are recorded from the point of view of the rest of the world. A positive (negative) figure for the balances of the various items therefore corresponds to net expenditure (revenue) for Belgium in relation to the rest of the world. In particular, a positive (negative) overall balance corresponds to net borrowing (lending) by Belgium in relation to the rest of the world.

2 These are net amounts, i.e. the difference between incomes or transfers received from other sectors and those paid to other sectors, excluding transfers in kind.

3 These are net amounts, i.e. the difference between transfers received from other sectors and those paid to other sectors, including net acquisitions of non-financial non-produced assets and net acquisitions of valuables.

1 In accordance with the ESA 2010, general government revenues do not include the tax revenues transferred to the EU or the revenues collected directly by the EU.

2 Mainly withholding tax on earned income, advance payments, assessments and proceeds of additional percentages on personal income tax.

3 Total social contributions, including the special social security contribution and the contributions of non-active persons.

4 Mainly advance payments, assessments and the withholding tax on income from movable property payable by companies.

5 Mainly the withholding tax on income from movable property payable by households, the withholding tax on income from immovable property (including proceeds of additional percentages), inheritance taxes and registration fees.

6 Property incomes, imputed social security contributions, current and capital transfers from other sectors and sales on produced goods and services, including activation of capital expenditure for own account.

7 New name for pre-pensions (early retirement).

8 Apart from the two main sub-categories mentioned in the table, this item also includes mainly allowances to handicapped persons and transfers to the institutions accommodating them, payments by subsistence funds and pensions to war victims.

1 With effect from 2015, these figures take account of advance payments of the regional surcharges on personal income tax, even though – according to the ESA 2010 methodology – these advance payments should be regarded as purely financial transactions, and the regional surcharges should not be taken into account until the time of the tax assessment. The approach adopted here corresponds to that used for formulating the budget targets set out in the recommendations of the "Public Sector Borrowing Requirements" section of the High Council of Finance or in the stability programmes.

1 Concept of debt as defined in Council Regulation (EC) N°. 479/2009 of 25 May 2009 on the application of the Protocol of the excessive deficit procedure annexed to the Treaty establishing the European Community.

2 Adjustment to the valuation of Treasury Certificates and Treasury bills to convert the discounted value to the face value, and since 2014, adjustment to the valuation of Ageing Fund assets in the establishment of the Maastricht Debt.

3 Adjustments permitting the transition from a net debt concept to the gross debt concept; certain assets being recorded in the official debt of the Treasury.

4 Mainly the debudgeted Treasury debt, the debts of the *Caisse des dépôts et Consignations - Deposito- en consignatiekas* and the RIF (from 2005 to 2008), coins in circulation and the imputed debt resulting from Belgium's participation in the mutual support mechanism of the European Financial Stability Fund (EFSF) (from 2011).

5 Federal government debt, the counterpart of which is an asset of the federal government unit. Since 2014, adjustment to the valuation of ageing Fund assets in the establishment of the Maastricht Debt.

6 Including the capitalised interest on "Ageing Fund Treasury Bonds".

7 Debt of a general government sub-sector, the counterpart of which is an asset of another general government sub-sector.

1 Concept of debt as defined in Council Regulation (EC) N°. 479/2009 of 25 May 2009 on the application of the Protocol of the excessive deficit procedure annexed to the Treaty establishing the European Community.

2 The endogenous change in the public debt is indicated by the difference between the primary balance required to stabilise the debt in % on GDP - i.e. the balance equal to the difference between the implicit interest rate and the nominal GDP growth rate, multiplied by the ratio between the debt at the end of the previous year and the GDP in the period considered - and the actual primary balance.

3 Percentage changes compared to the previous year.

4 A positive (negative) value means a factor increasing (reducing) the debt.

5 Excluding financial derivatives.

1 This item comprises other financial instruments within the meaning of the ESA 2010, such as investment fund shares, insurance technical reserves, derivatives and other accounts receivable/payable. It also covers errors and omissions on Belgium's financial account vis-à-vis the rest of the world which, for consistency between the accounts, are regarded as unrecorded capital movements.

2 The balances of the financial accounts of the domestic sectors do not correspond to the net financing capacities or requirements as recorded in the real accounts, owing to the differences between the dates of recording of the transactions in these two accounts, statistical adjustments or errors and omissions.
